SUMMARY

Computer Science undergraduate with a 3.94 CGPA, hands-on experience building full-stack and AI-powered applications. Proficient in full-stack development, Agile practices and testing, with experience using Java, JavaScript, React, Node.js, Firebase and SQL. Demonstrated leadership, cross-functional collaboration and communication through university organizations and project-based work. Seeking a 6-month internship starting October 2026 as a Software Engineer, Full-Stack Developer or in a related role, to apply skills in system architecture, full-stack development and agile practices to innovative, real-world projects.

EDUCATION

Universiti Teknikal Malaysia Melaka 2023 – Present
Bachelor's Degree in Computer Science (Software Development) with Honours
- Major in Software Development
- Current CGPA : 3.94

Kolej Tingkatan Enam Petaling Jaya, STPM 2021 – 2023
- CGPA : 3.09

SKILLS & ABILITIES

Technical Skills

- Languages: Java, JavaScript, PHP, C++, SQL, Python, Dart
- Frameworks & Technologies: React.js, Node.js, Express.js, Laravel, Blade, REST APIs, HTML5, CSS3, Flutter
- Databases & Cloud: MySQL, Firebase Firestore, Firebase Auth, Supabase
- Tools: GitHub, VS Code, Postman, Android Studio, Figma, Canva, Microsoft Office, Debugging

Spoken Languages

- English (Fluent), Malay (Fluent), Tamil (Native)

CERTIFICATIONS

Oracle Certified Foundations Associate, (Credential ID - 3264500260DB12COJA) 2026

PROJECTS

LUMORA: Smart Mental Health Monitoring System For Students Apr 2026 – Jun 2026
GitHub Repository 🔗

- Built a full-stack student wellness platform using React, Node.js/Express, MySQL and Firebase Firestore hybrid architecture, featuring role-based dashboards, mood and sleep tracking, digital journaling and clinical assessments.
- Developed AI-powered features using the Groq API, including a conversational support companion, sentiment-based mood detection, academic stress forecasting and crisis alerts with automated wellness reports.
- Applied Agile practices through iterative feature delivery, test case execution, self-code reviews and technical documentation across core system features.

iPetro: Inspection Report Generator

Nov 2025 – Jan 2026

GitHub Repository [🔗](#)

- Built a Laravel-based web platform to digitize API 510 industrial inspection workflows, replacing manual paper-based recordkeeping for inspection tracking and reporting.
- Developed automated inspection report generation, photo management and an analytics dashboard to streamline inspection review and reporting.
- Collaborated in an Agile team using iterative milestones, peer code reviews, testing and shared technical documentation.

Farm2Screen

Oct 2025 – Dec 2025

GitHub Repository [🔗](#)

- Built a cross-platform Flutter marketplace app (Firebase Auth/Firestore, Supabase Storage, Google Maps) spanning 20+ features, connecting pineapple farmers directly to consumers and wholesalers without middlemen.
- Implemented real-time sales analytics, order and inventory management as well as location-based entrepreneur discovery, giving farmers visibility into performance and direct market reach.

Exam Result Management System

Jun 2025 – Jul 2025

GitHub Repository [🔗](#)

- Developed a 3-tier distributed system (Java Swing teacher/student apps + PHP REST API + MySQL) enabling teachers to submit marks and students to securely view results across 58+ student records.
- Implemented JWT authentication with bcrypt password hashing, automated grade calculation and one-click Google Sheets export, eliminating manual paper-based result processing.

Retinal Disease Detection

May 2025 – Jun 2025

GitHub Repository [🔗](#)

- Built a Python desktop application using TensorFlow/Keras and Tkinter, integrating a trained CNN to classify retinal scans into 4 conditions with confidence and severity scoring.
- Implemented automated PDF report generation using FPDF to produce classification results, severity levels and supporting clinical information.

WORK EXPERIENCE

Uniqlo, Sunway Pyramid, Retail Associate

Jul 2024 – Oct 2024

- Collaborated with a team in a fast-paced retail environment to manage daily operations, including stock replenishment, product organization and store maintenance, while consistently meeting performance targets.
- Resolved customer inquiries and complaints in real time, developing strong communication and problem-solving skills under pressure.
- Coordinated with team members across shifts to maintain operational continuity, translating directly into experience working in structured, deadline-driven team settings.

LEADERSHIP & ACTIVITIES

Student Representative Council KTEPJ, Media Lead

2021 – 2023

- Led social media strategy and multimedia content production (video, graphics) for college-wide events, driving engagement across three platforms.
- Coordinated planning, logistics and promotion for multiple college events as part of the organizing team, working across departments to hit deadlines.

Developer Student Club UTeM, Media & Publicity Team Lead

2023 – 2026

- Led a team managing the club's digital presence across four social platforms, coordinating content strategy and posting schedules to grow event visibility and student engagement.
- Collaborated with external university tech clubs to co-promote joint events, strengthening cross-club partnerships and expanding reach beyond UTeM.
