SUMMARY

High-achieving Computer Science undergraduate (CGPA: 3.93) specializing in Software Development with technical knowledge in full-stack development, programming, and system design. Skilled in Java, JavaScript, React, Node.js and SQL, with hands-on experience managing technical and media-related projects. Demonstrated leadership, teamwork and communication abilities through university organizations and collaborative initiatives. Seeking a 6-month internship opportunity to contribute technical expertise and continue professional growth.

SKILLS & ABILITIES

Technical Skills

- Java, JavaScript, SQL, C++, HTML, CSS, React, Node.js, Express.js

Tools

- Visual Studio Code, GitHub, Android Studio, Git, Adobe Animate, Canva, Microsoft Office, Eclipse

Spoken Languages

- English (Fluent), Malay (Fluent), Tamil (Native)

PROJECTS

Lumora: Smart Student Mental Health Monitoring System

Apr 2026 – Jun 2026

- Built a full-stack web platform (React, Node.js/Express, MySQL, Firebase Firestore) for real-time student mental health monitoring, combining mood and sleep tracking, digital journaling and academic stress prediction.
- Developed AI-powered features using the Groq API (LLaMA 3.3 70B), including a conversational support companion, automatic mood detection, stress prediction and an early warning risk-detection system with role-based dashboards for students, counsellors and admins.

iPetro: Inspection Report Generator

Nov 2025 – Jan 2026

- Built a web-based system using PHP, Laravel, Blade and Node.js to streamline the management and monitoring of industry-related inspection operations, replacing manual paper-based workflows.
- Developed modules for inspection record tracking, inventory management and photo organization with automated API 510 report generation and an analytics dashboard.

Farm2Screen

Oct 2025 – Dec 2025

- Built a cross-platform mobile marketplace using Dart, Flutter and Firebase, enabling pineapple farmers to sell directly to consumers, wholesalers and businesses without middlemen.
- Implemented real-time pricing, order management and direct farmer-to-customer transactions, expanding market reach through increased online visibility and boosting sales.

Exam Result Management System

Jun 2025 – Jul 2025

- Developed a software application using PHP, Java, MySQL, and Java Swing to centralize the recording, management, and publishing of students' examination results, reducing manual errors and eliminating paper-based handling.
- Implemented student result entry with automated grade calculations, secure online result viewing, and export to Google Sheets, improving transparency and simplifying reporting for teachers and administrators.

Retinal Disease Detection

May 2025 – Jun 2025

- Built an AI-powered desktop application using Python, TensorFlow, NumPy and Pillow to assist in the early identification of retinal diseases from eye scan images.
- Designed and trained a CNN for image preprocessing and automated disease prediction, with a user interface for image upload, analysis and report generation to support fast and reliable screening.

EDUCATION

Bachelor's Degree in Computer Science (Software Development) with Honours <i>Universiti Teknikal Malaysia Melaka</i> • Major in Software Development • Current CGPA : 3.93	2023 – Present
STPM <i>Kolej Tingkatan Enam Petaling Jaya</i> • CGPA : 3.09	2021 – 2023

CERTIFICATIONS

Oracle Certified Foundations Associate, Database <i>(Credential ID - 326450026ODB12COJA)</i>	2026
--	------

LEADERSHIP & CROSS-FUNCTIONAL COLLABORATION

Media & Publicity Team Lead <i>Developer Student Club UTeM</i> • Lead a team managing the club's digital presence across four social platforms, coordinating content strategy and posting schedules to grow event visibility and student engagement. • Collaborate with external university tech clubs to co-promote joint events, strengthening cross-club partnerships and expanding reach beyond UTeM.	2023 – Present
Media Lead <i>Student Representative Council KTEPJ</i> • Led social media strategy and multimedia content production (video, graphics) for college-wide events, driving engagement across three platforms. • Coordinated planning, logistics, and promotion for multiple college events as part of the organizing team, working across departments to hit deadlines.	2021 – 2023
